

CAVITY WALL WIDE OUTER LEAF (WOL)

APPLICATION

These lintels are suitable to support a 125-150mm outer leaf of blockwork or stonework.

Standard (WOL) and Heavy Duty (HD WOL & HDX WIL)

Designed to support:

- Masonry loads
- Masonry loads and uniformly distributed timber floor loads
- Uniformly distributed roof loads (in most cases HD lintel type is required)

Extra Heavy Duty (XHD WOL) and Composite Extra Heavy Duty (CXHD WOL)

Designed to support:

- Concrete floor loads
- Attic truss loads
- Point loads: compound trusses, steel beams, etc

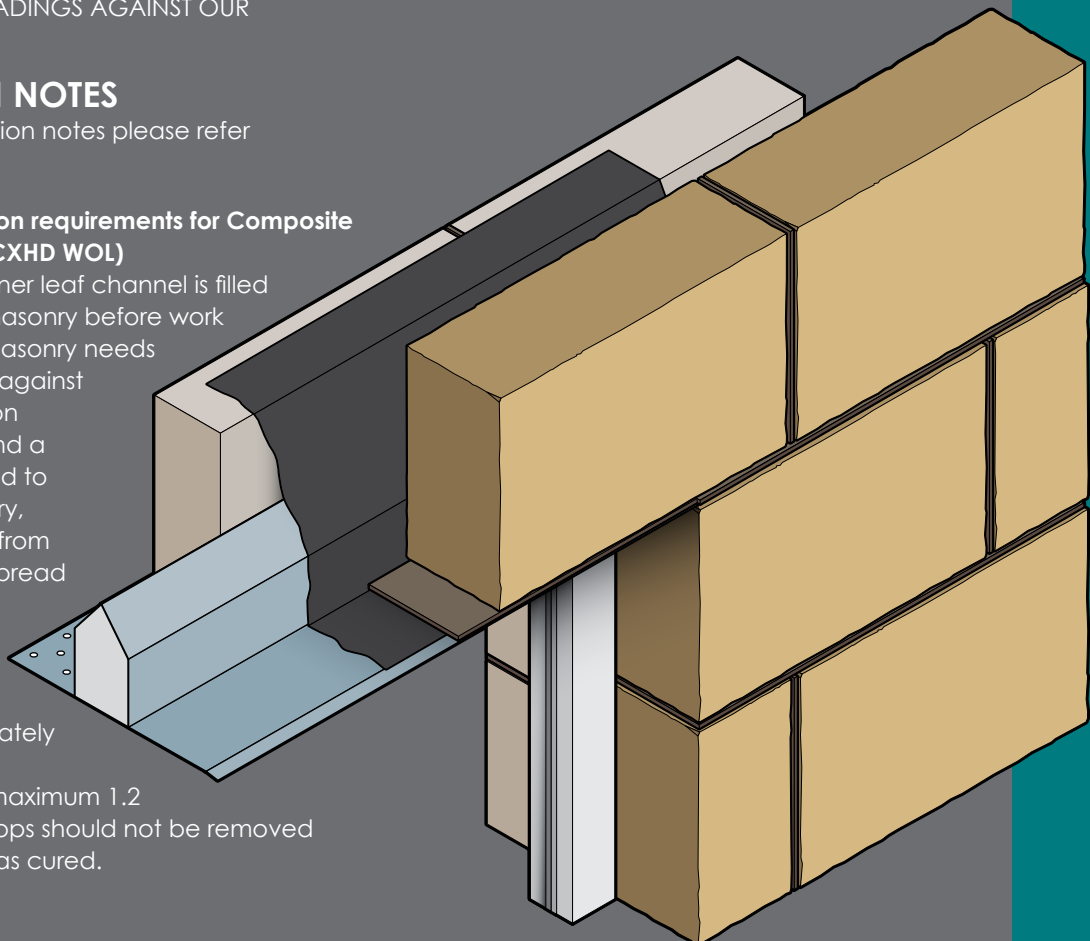

ALWAYS CHECK LOADINGS AGAINST OUR LOAD-SPAN TABLE

INSTALLATION NOTES

For general installation notes please refer to page 66.

Additional installation requirements for Composite Extra Heavy Duty (CXHD WOL)

- Ensure that the inner leaf channel is filled with well cured masonry before work proceeds over. Masonry needs to be built tightly against the vertical section of the channel and a mortar joint added to the top of masonry, so that the loads from units above are spread evenly over the inner flange of the lintel.
- Composite lintels should be adequately propped during construction, at maximum 1.2 metre centres. Props should not be removed until the mortar has cured.

WIDE OUTER LEAF (WOL)

ADVANTAGES

- Easy to install and suitable for a variety of applications
- Galvanised coating ensures durability/longevity
- Built-in plaster key – perforated base plate to inner flange
- Excellent thermal efficiency
- Built-in continuous insulation

ABBREVIATIONS

UDL – Uniform Distributed Load (Serviceable)

RM – Resistance Moment (Serviceable)

SWL – Safe Working Load

If in doubt please contact our technical department on

01455 272457
